**Springfield, VA – March 14, 2017** – Versar, Inc. (NYSE MKT: VSR) today announced that the Environmental Protection Agency (EPA) has awarded it a \$1.4 million Task Order to provide technical expertise that will review and evaluate pesticide human exposure data.

The Task Order is the first awarded to Versar under an Indefinite Delivery Indefinite Quantity (IDIQ) contract awarded to Versar by the EPA's Office of Pesticide Programs (OPP). On September 6, 2016, Versar announced that had been awarded one of three IDIQ contracts supporting the EPA OPP's provision of scientific data reviews and evaluations to support pesticide registration. The contract, with a period of performance through July 2021, is for a maximum of \$20 million.

The Task Order consists of one base year and five option years. Each year calls for providing review and evaluation of Occupational and Residential Exposure data, worker protection evaluations, workshops, seminars and training, and exposure model and database development and enhancement.

Tony Otten, Chief Executive Officer of Versar, said, "Versar is pleased to have been awarded this Task Order by EPA's OPP, a consistent and valued customer for more than 30 years. Versar competitively won this first task order as we continue to expand our ongoing three-decade working relationship with EPA OPP under the IDIQ contract."
